ABOUT US

Who We Are

SEAL FLEXITANK is a specialized flexitank brand of Sealbox Logistics Inc., delivering high-performance bulk liquid transportation solutions worldwide. We design, supply, and support flexitanks for food-grade, industrial, and specialty liquid cargo, combined with full logistics execution from origin to destination.

From vegetable oils and wine to non-hazardous chemicals and industrial liquids, SEAL FLEXITANK ensures safety, efficiency, and cost optimization for every shipment.

SEAL FLEXITANK operates under Sealbox Logistics Inc., a Canada-based logistics company with global operations and deep experience in international freight forwarding, containerized shipping, and supply chain solutions. By combining advanced flexitank technology with logistics execution, we provide customers with a single, reliable partner for bulk liquid transport.

Capabilities at a Glance

- Complete range of certified flexitank systems
- Strong focus on safety, quality, and compliance
- Global logistics and freight forwarding support
- Reduced shipping costs versus drums and ISO tanks
- Environmentally responsible bulk transport

A SEAL Flexitank loaded and ready for transport inside a 20ft shipping container.

WHY CHOOSE US

A Trusted Partner in Bulk Liquid Logistics

SEAL FLEXITANK operates under Sealbox Logistics Inc., a Canada-based logistics company with global operations and deep experience in international freight forwarding, containerized shipping, and supply chain solutions. That combination of manufacturing capability and logistics expertise is what sets us apart.

What Sets Us Apart

- Independently certified products, compliant with international quality and safety standards
- Manufacturer-direct customization of tank specifications, sizes, and configurations to match customer requirements
- No hidden costs — unlike tank containers, flexitanks generally avoid demurrage, cleaning, repositioning, and off-hire charges
- Fast lead times, with flexitanks stocked at strategic global locations
- Technical training and certification programs for safe installation and handling
- Worldwide technical support through a network of offices, partners, and representatives

Engineered for demanding cargo: a Bitumen Flexitank rated to 120°C.

HOW WE WORK

Our Process

From supply through to disposal, SEAL FLEXITANK manages the full lifecycle of every shipment with a consistent, six-step process.

01	Supply of the Flexitank Providing a certified flexitank suited to the specific liquid cargo and container type.
02	Installation within the Container Properly fitting and securing the flexitank inside the container according to safety standards.
03	Trucking Transporting the loaded or empty container by road to or from the designated location.
04	Technical Support On-site or remote assistance to ensure correct installation, loading, and discharge of the flexitank.
05	Shipping Moving the container by sea or other modes to the final destination, in compliance with shipping regulations.
06	Disposal or Recycling Environmentally responsible removal and recycling or disposal of the used flexitank after discharge.

WHAT WE OFFER

Our Product Range

SEAL FLEXITANK offers a complete portfolio of flexitank systems and accessories, designed for different transport modes, liquids, and operating conditions. Full specifications for each product are available in our Product Catalogue.

Product	Overview
Standard Flexitank	For non-hazardous liquid chemicals — oils, glycerin, fatty acids, glycols, resins, and more.
Food Grade Flexitank	Certified food-grade systems for wine, edible oils, juices, syrups, and other consumables.
Wine Flexitank	EVOH oxygen-barrier construction that preserves aroma, flavor, and quality in transit.
Truck Flexitank	Vehicle-mounted systems for 13m flatbed trucks, 14–22 m ³ capacity.
Bitumen Flexitank	Engineered for hot bitumen and non-hazardous liquids up to 120°C.
Paper IBC	Foldable, recyclable intermediate bulk container, 200–950 litre capacity.
Heating Pads	Steam and electric systems that maintain cargo temperature and viscosity in transit.
Ball & Butterfly Valves	Corrosion-resistant, flange-mounted valves for safe, leak-free handling.
High-Performance PE Film	Premium polyethylene film with superior strength and heat-sealing performance.
